### About the Organizer

The Christian Commission for Development in Bangladesh (CCDB) is a national NGO established in 1973 envisioning a just and caring society where people live in peace, with dignity and harmonious relationship with all God's creations. Experiencing the devastating consequences of climate disasters in Bangladesh, CCDB realized that concrete solutions are needed to address climate change problems to initiate the transition to a climate resilient future. Therefore, CCDB set up a dedicated Climate Change Program in 2009. The program aims to create a climate sensitive and resilient society. It emphasizes on knowledge generation and sharing, climate learning and education, innovation of climate solutions, technology demonstration and dissemination, capacity development and community resilience building.
